

## **IMPORTANT SAFETY WARNING**

### **Bendy Man Clocks**

We are writing to alert you to a potential safety issue with the Bendy Man clocks which, according to our records, have been distributed to children at your school since January 2017.

There is a manufacturing problem with some clocks in the latest batch meaning that access to the battery compartment at the top of the Bendy Man's head is too easy. This defect could result in unintended release of the AG10/LR54 button cell battery, which is a choking hazard for younger children/siblings. We have not found any issues with Bendy Men distributed prior to this date.

### **Children are advised to stop using the Bendy man clock immediately.**

We are concerned at the risk of serious harm to younger children and are therefore asking you to advise parents of the potential hazard and request that they return the product to the school for us to collect or safely dispose of them.

We thank you for your cooperation and apologise for any inconvenience, and you have our assurance that we are working with our supplier to address this matter.

If you have any questions or concerns, please contact us by email [Enquiries@lepra.org.uk](mailto:Enquiries@lepra.org.uk) or by telephone on (01206) 216752.

*C.A. Ransom*

Yours sincerely,
